## **Dimensioned drawings**

All dimensions in millimeters

## Calculation of the effective protective field height Hpfe = Hpfn + B + C

HPFE Effective protective field height = 2117 mm

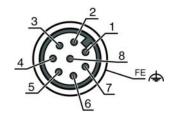

HPFN Nominal protective field height = 2100 mm

- A Total height = 2166 mm
- B 7 mm
- C 10 mm
- R Effective protective field height HPFE goes beyond the dimensions of the optics area to the outer borders of the circles labeled with R.

#### **Electrical connection**

| Connection 1       |                   |
|--------------------|-------------------|
| Type of connection | Connector         |
| Function           | Machine interface |
| Thread size        | M12               |
| Туре               | Male              |
| Material           | Metal             |
| No. of pins        | 8 -pin            |
| Encoding           | A-coded           |
| Connector housing  | FE/SHIELD         |

| Pin | Pin assignment | Conductor color |
|-----|----------------|-----------------|
| 1   | IO1            | White           |
| 2   | VIN1           | Brown           |
| 3   | IN3            | Green           |
| 4   | IN4            | Yellow          |

#### **Circuit diagrams**

Connection diagram receiver

- VIN1 = +24 V, VIN2 = 0 V: transmission channel C1
- VIN1 = 0 V, VIN2 = +24 V: transmission channel C2

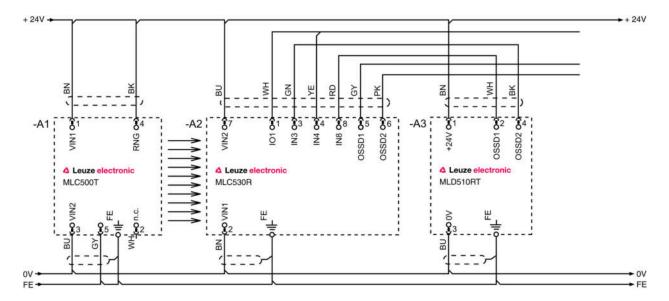

Operating mode 1: circuit diagram example of linkage with position switch for monitoring for the presence of machine parts with fixed blanking

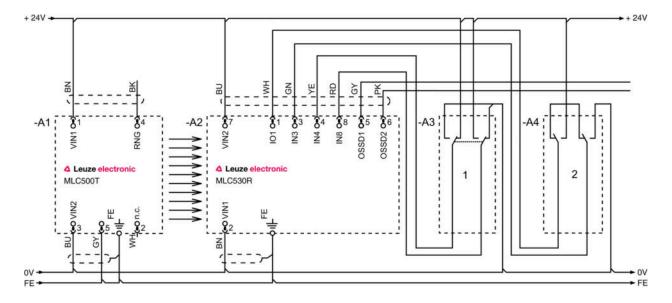

- Linked safety sensor, e.g. safety door switch Key switch for teaching ("teach key switch")

Operating mode 2: circuit diagram example of linkage of electronic safety-related switching outputs for the combined monitoring of access points and areas

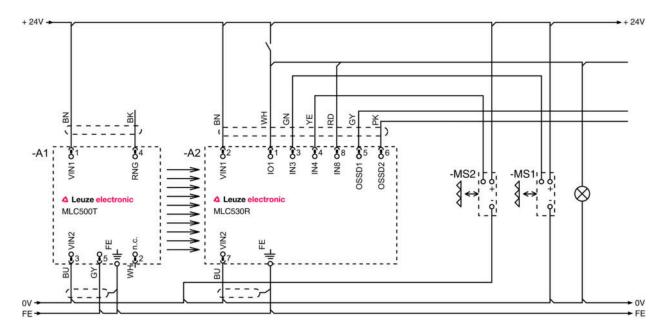

Operating mode 3: circuit diagram example of a linked, contact-based position switch for monitoring of the blanked object and a changeover switch for switching between function groups FG1 and FG2

- 1 Changeover key switch for switching between function groups FG1 and FG2
- 2 Key switch for teaching blanking areas

### Operating mode 4: circuit diagram example for timing controlled 2-sensor muting

## **Operation and display**

#### **LEDs**

| LED | Display                     | Meaning                                                                                                               |
|-----|-----------------------------|-----------------------------------------------------------------------------------------------------------------------|
| 1   | Off                         | Device switched off                                                                                                   |
|     | Red, continuous light       | OSSD off                                                                                                              |
|     | Red, flashing, 1 Hz         | External error                                                                                                        |
|     | Red, flashing, 10 Hz        | Internal error                                                                                                        |
|     | Green, flashing, 1 Hz       | OSSD on, weak signal                                                                                                  |
|     | Green, continuous light     | OSSD on                                                                                                               |
| 2   | Off                         | RES deactivated or RES activated and enabled or RES blocked and protective field interrupted                          |
|     | Yellow, continuous light    | RES activated and blocked but ready to be unlocked - protective field free and linked sensor is enabled if applicable |
|     | Yellow, flashing            | Upstream safety circuit opened                                                                                        |
|     | Yellow, flashing (1x or 2x) | Changeover of the upstream safety circuit                                                                             |
| 3   | Off                         | No special function (blanking, muting, etc.) active                                                                   |
|     | Blue, continuous light      | Protective field parameter (blanking) correctly taught                                                                |
|     | Blue, flashing, 1 Hz        | Muting active                                                                                                         |
|     | Blue, short flashing        | Teaching of protective field parameters or muting restart required or muting override active                          |
|     | Blue, flashing, 10 Hz       | Error during teaching of protective field parameters                                                                  |
