EVKT-LT-KNOB

Magnetic Knob for TBMA-LT Evaluation Boards

New

[Datasheet](#)

Description

The EVKT-LT-KNOB is an accessory plastic knob equipped with a cylinder magnet. It is designed to fit all TBMA-LT evaluation boards. The MACOM evaluation kit connects the TBMA-LT evaluation boards to a PC, while the MACOM GUI displays rotational motion.

The magnet is diametrically magnetized to produce the correct input signal for MPS's MagAlpha family of sensors.

The EVKT-LT-KNOB is designed to work with TBMAxxx-Q-LT-xxx sensor
