Safe Break E-Stops World's Safest Emergency Stop Switches IDEC

16mm XA & 22mm XW E-Stops

Key features of the XA and XW E-Stops include:

- Lead-free (RoHS compliant)
- The depth behind the panel is only 48.7mm for 4 contacts (XW Series)
- IDEC's original "Safe Break Action" ensures the contacts open if the contact block is separated from the operator
- Pushlock Reset and Push-Pull in the same switch
- Direct opening action mechanism (IEC60947-5-5, 5.2, IEC60947-5-1, Annex K)
- Safety lock mechanism (IEC60947-5-5, 6.2)
- Degree of protection IP65 (IEC60529)
- Screw terminal is finger-safe (IP20)
- Two button sizes: 40mm and 60mm (XW Series)
- Rated Insulation Voltage 16mm 300V, 22mm 250V
- Rated Thermal Current 5A
- UL, c-UL Listed, CE marked (XA Series UL recognized)

If the E-Stop is installed incorrectly or shifts in shipment, the contacts and switch can separate, which cause the NC contacts to remain closed during an emergency and the machine to continue running!

With IDEC's revolutionary "Safe Break Action," the NC contacts will automatically open when the contacts are removed from the operator. This feature places the machine in a non-operational state.
