SBK-32
32 SIMs
Remote SIM Bank

SBK-32 is a Remote SIM Bank with 32 sims that can connect with serial MV-37X via internet. SIM cards no longer need to be installed in MV-37X anymore; you can deploy your GSM gateways in different locations and countries. New concept of using SBK-32 solution, you can centralize and supervise all sims in one place. In that case, SIM management will be easy, quick and safe as well. All SIM cards can be stored and controlled in one secure place.

Once in a while, MV-37X must change SIM cards to get the best rate on different GSM operators. With SBK-32, you can place physical sims in office or change SIM corresponding port directly on web any second. MV-37X connects with SBK-32 to read the SIM information and register it on the GSM network.
