

Zero setter

Mechanical; for measuring micro-tools

Application:

for accurately determining the position of workpiece surfaces or workpiece lengths in the Z direction on lathes or milling machines. the device is placed on the workpiece.

Execution:

- For measuring micro-tools, possible up to dia. 0.1 mm.
- Thanks to the safety spring travel, the zero setter is unaffected by an overrun of a maximum of 2 mm.
- Ref. no. 23932031: To enable mounting of the zero adjuster on the side, a version with built-in magnets is available.

Delivery:

1x zero setter in a wooden case with serial number and test certificate.

Art. no.	23932 030
Brand	TSCHORN
Manufacturer Part Number	002400100
Design	Steel
Probe head diameter	42 mm
Scale value	0.01 mm
Diameter	54.5 mm
Height	101 mm
Gross Weight	1.130 kg
Product Group	227
