SiBRAIN for dsPIC33FJ256GP710A

PID: MIKROE-4690

SiBRAIN is a standardized microcontroller add-on board, which allows very simple installation and replacement of the microcontroller unit (MCU) on a development board equipped with the SiBRAIN Card socket. By introducing the new SiBRAIN standard, we have ensured the absolute compatibility between the development board and any of the supported MCUs, regardless of their pin number and compatibility. SiBRAIN is equipped with two 168-pin mezzanine connectors, allowing it to support even MCUs with extremely high pin count. The clever design allows very simple usage, following the well-established plug & play concept of the Click board™ line of product.

Specifications

Type	8th Generation
Architecture	dsPIC/PIC24 (16-bit)
MCU Memory (KB)	256
Silicon Vendor	Microchip
Pin count	100
RAM (Bytes)	30720
Supply Voltage	3.3V
