<b>No. of monitors</b>	2
<b>Memory</b>	2 GB
<b>Memory interface</b>	64 bit
<b>Form factor</b>	Low profile ATX (full height)
<b>Application</b>	PC
<b>Ventilation</b>	Active
<b>Includes</b>	Low-profile bracket

## Product details

You and your team will be well-equipped with the high performance 4X60M97031 video card from Lenovo. The computer processor sends data to the graphics card, which then converts it so that it can be shown on a monitor. With a 2 GB memory the NVIDIA GeForce GT 730 is quite versatile and can easily accommodate web-based applications as well as office programs. To get rid of hot air in the case, this device is equipped with an active cooling function that implements a blower. By means of a PCI Express x8 slot this card can be connected with the main processor's chipset.

Take advantage of exceptional quality and all-round excellent service — from order to delivery. Get it now!
