

31-May-2022

PCN #: PCN-22-137689

Subject : Straight .110 series FASTON

Description of Change : Lower the side wall on the transition area between the crimp and mating rolls. From .051"[1.29mm] to .040"[1.02mm]. The PNs 160303-X and 160316-X were already changed, but there was a drafting unit conversion error on the customer drawings to be corrected.

Reason : Original change was to lower unusually high transition side wall that was occasionally prone to cracking during crimp. This ECR is correcting drafting errors on the mm to inch conversion.
