

Fork extension, lower side closed

For loads which lie outside of the base fork teeth

Application:

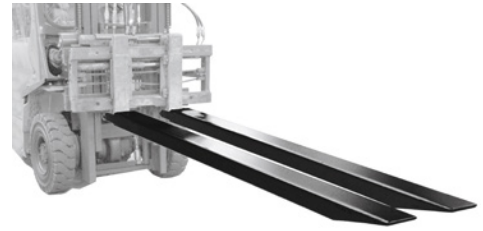

Ideal solution for loads which are longer than the fork prongs of the industrial truck, allowing rapid and convenient insertion of the fork prongs. Can be used also for loads which lie outside of the base fork teeth.

Execution:

- Sturdy steel structure
- Secured with socket pin
- Lower side closed

Delivery:

In pairs

Art. no.	50263 170
Length	1800 mm
