

Die holder with quick-change system

For mounting in basic holders with quick-change system

Application:

Die holder with quick-change system for holding dies. The die holder is inserted into the basic holder using the quick-change mechanism and then pushed onto the arbour. On approaching the tailstock spindle, the tool is positioned straight and the thread can be cut.

Advantage:

- User-friendly machine handling thanks to quick-change system
- Reliable positioning and precise thread cutting without stripping threads
- No thread distortion

Art. no.	13535 550
Suitable for mandrel size	2
Suitable for die size	25 x 9 mm
Gross Weight	0.160 kg
Product Group	1DE
