

3-point internal micrometer

ATORN®

Application

For measuring through-bores and short centring shoulders.

Version

- Scale with anti-glare, brushed chromium plated finish
- Measuring faces made of hardened steel
- Friction coupling for consistent, repeatable measuring force

Delivery

In a case

Art. No.	31915 360
Calibration Group	I
Min./max. length measuring range	60-70 mm
Error limit	5 µm
Vernier scale	0.005 mm
Measuring depth	79 mm
Measuring spindle increments	0.5 mm
DIN	863
