

Title of Change:	Add V-notch Lead frame to Improve Delamination on SOD323 at ON Semiconductor, Leshan, China factory							
Proposed Changed Material First Ship Date:	06 Jun 2018							
Current Material Last Order Date:	29 September 2017 Orders received after the Current Material Last Order Date expiration are to be considered as orders for new changed material as described in this PCN. Orders for current (unchanged) material after this date will be per mutual agreement and current material inventory availability.							
Current Material Last Delivery Date:	30 March 2018 The Current Material Last Delivery Date may be subject to change based on build and depletion of the current (unchanged) material inventory.							
Product Category:	Active components – Discrete components							
Contact information	Contact your local ON Semiconductor Sales Office or <Coleen.Long@onsemi.com>							
Samples	Contact your local ON Semiconductor Sales Office to place sample order. Sample requests are to be submitted no later than 45 days after publication of this change notification.							
Sample Availability Date:	23 June 2017							
PPAP Availability Date:	23 June 2017							
Additional Reliability Data	Contact your local ON Semiconductor Sales Office or <Coleen.Long @onsemi.com>.							
Type of Notification	This is a Final Product/Process Change Notification (FPCN) sent to customers. FPCNs are issued 12 months prior to implementation of the change or earlier upon customer approval. ON Semiconductor will consider this proposed change and it's conditions acceptable, unless an inquiry is made in writing within 45 days of delivery of this notice. To do so, contact <PCN.Support@onsemi.com>.							
Change Category	Type of Change							
Process – Assembly	Change in leadframe design							
Description and Purpose:								
<p>ON Semiconductor is notifying customer of its use of V-notch Lead frame for SOD323 devices at ON Semiconductor's Leshan, China factory.</p> <p>Upon the expiration of this PCN, devices will be built with V-notch Lead frame at the same site. Datasheet specifications and product electrical performance remain unchanged. Reliability Qualification have been performed.</p>								
<table border="1" style="width: 100%; border-collapse: collapse;"> <thead> <tr style="background-color: #92d050;"> <th style="width: 33%;">Material to be changed</th> <th style="width: 33%;">Before Change Description</th> <th style="width: 33%;">After Change Description</th> </tr> </thead> <tbody> <tr> <td style="text-align: center;">Leadframe</td> <td style="text-align: center;">Non V-notch</td> <td style="text-align: center;">With V-notch</td> </tr> </tbody> </table>			Material to be changed	Before Change Description	After Change Description	Leadframe	Non V-notch	With V-notch
Material to be changed	Before Change Description	After Change Description						
Leadframe	Non V-notch	With V-notch						
Reason / Motivation for Change:	<ul style="list-style-type: none"> - Quality improvement : Yes. Delamination performance improvement. - Change benefits for customer: V-notch Lead frame has better performance of delamination. - Risk for late release for customer: longer lead time due to limited flexibility in terms of manufacturing and capacity planning. 							
Anticipated impact on fit, form, function, reliability, product safety or manufacturability	<p>The device has been qualified and validated based on the same Product Specification. The device has successfully passed the qualification tests. Potential impacts can be identified, but due to testing performed by ON Semiconductor in relation to the PCN, associated risks are verified and excluded.</p> <p>No anticipated impacts.</p>							

Sites Affected:				
<input type="checkbox"/> All site(s) <input type="checkbox"/> not applicable <input checked="" type="checkbox"/> ON Semiconductor site(s) : ON Leshan, China <input type="checkbox"/> External Foundry/Subcon site(s)				
Marking of Parts/ Traceability of Change:		Affected products will be identified with date code.

HAST	JESD22-A110	130°C, 85% RH, 18.8psig, bias	192 hrs	0/240
AC	JESD22-A102	Ta = 121°C, P= 15 PSIG, RH = 100%, 192 Hours	192 hrs	0/240
PC	J-STD-020 JESD-A113	MSL 1 @ 260°C	Before TC, AC, HAST, IOL	0/960
RSH	JESD22- B106	Ta = 265°C	10 sec	0/90
Note: <ul style="list-style-type: none"> Above data come from L29666 (BCX19LT1G) which assembled with similar V-notch Lead Frame on SOT23 as generic data. SZMM3Z18VST1G, BAS16HT1G only PC+SAT was performed for this change, result shows it has better delamination performance to V-notch Lead Frame than non V-notch Lead Frame. 				
AEC-1pager is attached. To access file attachments on pdf copy of PCN, please be guided by the steps below: 1. Download pdf copy of the PCN to your computer 2. Open the downloaded pdf copy of the PCN 3. Click on the paper clip icon available on the menu provided in the left/bottom portion of the screen to reveal the Attachment field 4. Then click on the attached file/s				
Electrical Characteristic Summary:				
Electrical characteristics are not impacted.
