

**Miniature circuit breaker (MCB), 13A, 3p, D-Char, AC**

**Part no.** FAZ-D13/3  
**Catalog No.** 278894  
**Alternate Catalog No.** FAZ-D13/3  
**EL-Nummer (Norway)** 0001695231

|--|-----------|---|-----|
| Technical data for design verification                   |           |   |     |
| Rated operational current for specified heat dissipation | $I_n$     | A | 13  |
| Heat dissipation per pole, current-dependent             | $P_{vid}$ | W | 0   |
| Equipment heat dissipation, current-dependent            | $P_{vid}$ | W | 5.9 |

|  |                   |    |   |
|--|-------------------|----|---|
| Static heat dissipation, non-current-dependent   | P <sub>vs</sub>   | W  | 0   |
| Heat dissipation capacity  | P <sub>diss</sub> | W  | 0   |
| Operating ambient temperature min.   |                   | °C | -40   |
| Operating ambient temperature max.   |                   | °C | 75  |
|  |                   |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity |
| IEC/EN 61439 design verification   |                   |    |   |
| 10.2 Strength of materials and parts   |                   |    |   |
| 10.2.2 Corrosion resistance  |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.2.3.1 Verification of thermal stability of enclosures   |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat   |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat and fire due to internal electric effects           |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.2.4 Resistance to ultra-violet (UV) radiation   |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.2.5 Lifting   |                   |    |   |
| Does not apply, since the entire switchgear needs to be evaluated.   |                   |    |   |
| 10.2.6 Mechanical impact   |                   |    |   |
| Does not apply, since the entire switchgear needs to be evaluated.   |                   |    |   |
| 10.2.7 Inscriptions  |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.3 Degree of protection of ASSEMBLIES  |                   |    |   |
| Does not apply, since the entire switchgear needs to be evaluated.   |                   |    |   |
| 10.4 Clearances and creepage distances   |                   |    |   |
| Meets the product standard's requirements.   |                   |    |   |
| 10.5 Protection against electric shock   |                   |    |   |
| Does not apply, since the entire switchgear needs to be evaluated.   |                   |    |   |
| 10.6 Incorporation of switching devices and components   |                   |    |   |
| Does not apply, since the entire switchgear needs to be evaluated.   |                   |    |   |
| 10.7 Internal electrical circuits and connections  |                   |    |   |
| Is the panel builder's responsibility.   |                   |    |   |
| 10.8 Connections for external conductors   |                   |    |   |
| Is the panel builder's responsibility.   |                   |    |   |
| 10.9 Insulation properties   |                   |    |   |
| 10.9.2 Power-frequency electric strength   |                   |    |   |
| Is the panel builder's responsibility.   |                   |    |   |
| 10.9.3 Impulse withstand voltage   |                   |    |   |
| Is the panel builder's responsibility.   |                   |    |   |
| 10.9.4 Testing of enclosures made of insulating material   |                   |    |   |
| Is the panel builder's responsibility.   |                   |    |   |
| 10.10 Temperature rise   |                   |    |   |
| The panel builder is responsible for the temperature rise calculation. Eaton will provide heat dissipation data for the devices. |                   |    |   |
| 10.11 Short-circuit rating   |                   |    |   |
| Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |                   |    |   |
| 10.12 Electromagnetic compatibility  |                   |    |   |
| Is the panel builder's responsibility. The specifications for the switchgear must be observed.                                   |                   |    |   |
| 10.13 Mechanical function  |                   |    |   |
| The device meets the requirements, provided the information in the instruction leaflet (IL) is observed.                         |                   |    |   |
