

Spring balance

Spherical probe

ATORN®

Application

For testing and setting control elements with adjustable friction moments, contact forces in electrical switch gears and regulating and controlling elements in motor vehicles.

Version

- Measuring possible in both directions
- Dial face with scale in centinewtons (cN) or newtons (N)
- Error limit 0.01 x (final value + measured value)
- Trailing pointer

Delivery

In case

Art. no.	44100 061
Min./max. force of measuring range	10-100 cN
Scale value, force	2 cN
Meter diameter	36 mm
Sensor length	29 mm
Weight	64 g

EAN-Code

4050293187335
