

Stop with probe system

Stop the workpiece and check the position in one system

ORION[®]

Execution:

- Check repeat accuracy when clamping workpieces using a dial gauge/precision pointer.
- Immediate detection of warping in the clamping process and during machining.
- Fixed system prevents the stop from shifting.
- Pre-defined extensions for flexible workpiece positioning, see accessory „Extension with tracer pin“ (article number 26120001-004).

Advantage:

- Compatible with common dial gauges thanks to 8 mm mounting hole.
- Compatible with many clamping devices as it attaches via a 12x80 mm slotted hole.
- For universal use in production and inspection.
- Extensions/tracer pins and dial gauges are simple to replace and secure thanks to a positive-locking clamp.

Delivery:

1 x stop and extension with tracer pin (25-mm usable length), no dial gauge/measuring equipment

Art. no.	26120 000
Brand	ORION
Manufacturer Part Number	26120000
Width	24 mm
Length	124 mm
Nominal slot size (h6)	12 mm
Gross Weight	0.300 kg
Product Group	2AY

EAN

4053625705771
