

# JBC NT115 Nano Handle

[Product Application Map](#)

[News](#)

NT115 Nano Handle provides the **highest precision when soldering SMDs.**

The short-distance tip-to-grip provides greater manual control of the tool, including when using a magnifying glass. The grip also offers a soft and comfortable feel and prevents the fingers from sliding down.

NT115 Nano Handle works exclusively with Nano Stations and uses C115 Cartridge Range.

Easy grip replacement

You can easily change the damaged N8662 Grips for NT115 Nano Handle by using the Slide-on tabs.
