MINI® ADD-A-CIRCUIT® SERIES FUSE HOLDER FOR MINI®, LOW PROFILE MINI®, OR MICRO2® FUSES

Description

The MINI® Add-A-Circuit® Series Fuse Holder for MINI®, Low Profile MINI®, or MICRO2® Fuses is designed to allow easy installation of additional circuits without any cutting or splicing, which is typically necessary to prevent voiding a new vehicle warranty. The fuse tap turns a single fuse slot into two slots so you can protect the new accessory circuit as well as the existing circuit.

The MINI® Add-A-Circuit® fuse tap is available for MINI®, Low Profile MINI®, and MICRO2® fuses. Available blister packaged MINI® Add-A-Circuit® kits come with a set of fuses (3A, 5A, 7.5A, and 10A) in the corresponding MINI®, Low Profile MINI®, or MICRO2® fuse style.

Applications

• Add-On Accessory Circuits
