

## Aluminium double bridge

eepos

### Application:

A double-girder crane is used where loads need to be distributed more evenly across multiple chassis and offers extended possibilities for attaching lifting devices.

### Execution:

- One set includes: 1 aluminium double girder crane with 4 profile closures, 4 hinge trolleys for connecting to the crane runway and 1 gap trolley for lifting equipment.

### Advantage:

- Ergonomic, effortless work
- Low noise emissions
- Smooth running
- Intelligent modular system with a wide range of accessories
- Ensures that the highest level of quality and profitability is retained
