

UNIVERSAL HOLDER USBII

Part No: ACC - 001

The High Speed *Bluetooth* USB Adapter is the latest in the EZURiO range of Professional *Bluetooth* products and is the world's first *Bluetooth* USB adapter that has been designed specifically to deliver the high data rates of modern technology.

To allow our customers the option of externally mounting the *Bluetooth* USB adapter a universal holder has been designed to meet demand. Being made of durable material and discrete in size allows for the secure mounting of the *Bluetooth* USB adapter anywhere.

The Universal Holder is supplied with both counter sunk holes for hard mounting using screws and with a self adhesive foam pad. The Universal Holder is designed specifically for the High Speed *Bluetooth* USB Adapter and the industrial environment and as such has specially designed indentations and interference points to hold the adapter securely in place.
