APPLICATIONS

Self Tapping stainless steel screws are widely used in many applications to secure two materials together. Suitable for outdoor use and where improved corrosion resistance is required. Typical applications include manufacturing, construction, joinery, maintenance and DIY tasks. Suitable for use in food, medical and non-severe chemical environments, and in both low and high temperature applications. Note: Not suitable for use with non-oxidising acids and agents or in chloride rich environments. These self tapping screws are designed for use with sheet metal and will require a pilot hole for this purpose. Pan head, self tapping screws are typically used for high torque applications into metal or wood and some plastics.
