

Model number

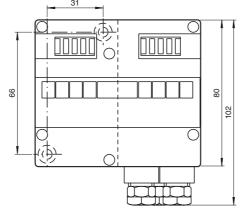

VBA-2E-G4-I

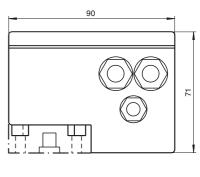

G4 module IP65 2 analog inputs (current)

Features

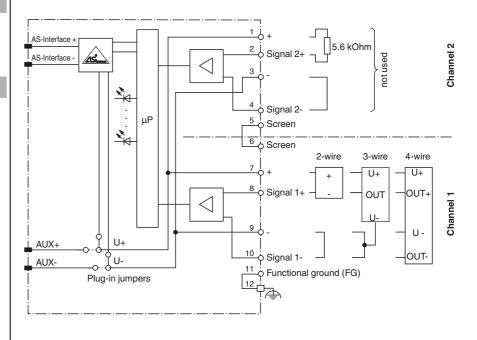

- Protection degree IP65
- Flat or round cable connection (via standardized EEMS base, not included with delivery)
- · Cable piercing method for flat cable
- Function display for bus, external auxiliary voltage and inputs
- Supply of inputs external or from the module, as required

Dimensions

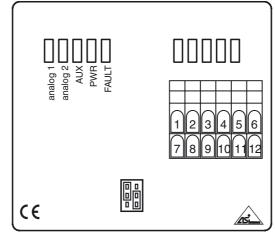

Electrical connection

Indicating / Operating means

Spring terminal block:

1: 24V ext. 7: 24V ext.

2: Sig.+ Ch. 2 2: Sig.+ Ch. 1

3: 0 V ext. 9: 0 V ext.

4: N.C. 10: N.C.

5: Shield 11: FG

6: Shield 12: FG

Plug-in jumper:

Power supply of outputs from the external auxiliary power

Power supply of outputs from the module (AS-Interface)

Notes

Protection degree

Do not connect inputs and outputs, which are supplied via the module from AS-interface or via auxiliary power, with power supply and signal circuits with external potentials.

EN 60529:2000

Function

The VBA-2E-G4-I analogue module has two analogue current inputs 4 mA ... 20 mA. The asynchronous transformation of measured values and the data transfer is accomplished in accordance with AS-Interface profile 7.3. The measured-value transmitter can be supplied from the AS-Interface or from the external auxiliary power via the black flat cable, depending on the wiring of the plug-in jumpers. The resolution of the analogue values is 16 bit. System disturbances are eliminated, using a programmable filter (50 Hz/60 Hz).

The IP65 rated G4 module is especially suitable for rough conditions. Connection to the measured-value transmitters is established by means of cable glands and cage tension spring terminals thus making the installation especially user-friendly. For pre-addressing the module it can be plugged directly onto the adapter of the hand-held programming device VBP-HH1.

Both flat and round cables can be used for the connection of the AS-Interface transmission line and the external 24 V DC power supply. Use the U-G1FF base for the AS-Interface flat cable. The AS-Interface standardised EEMS interface, uses the cable piercing method to connect both the yellow and black flat cables.

Use the U-G1PP base for a round cable. The AS-Interface cable as well as the external power supply may be connected within the U-G1PP base.
