

# DIGITAL INDOOR TV ANTENNA

**Introduction:**

This is a special designed antenna for digital terrestrial TV broadcasting reception. It is the best solution for home reception and digital portable TV reception. The universal bracket enables the antenna to stand on the table or mount on the wall vertically or horizontally for the best reception. This antenna is active that can be possible powered by external adapter, or by TV/set-top box via coaxial cable.

**Technical Data:**

Frequency range: VHF: 87.5~230MHz; UHF: 470-862 MHz  
 Receiving range: FM/VHF/UHF  
 Gain: 5-7dB  
 Impedance: 75Ω  
 Power supply: passive

**Included in Package:**

Before installation, please check the contents.  
 1. Antenna main unit

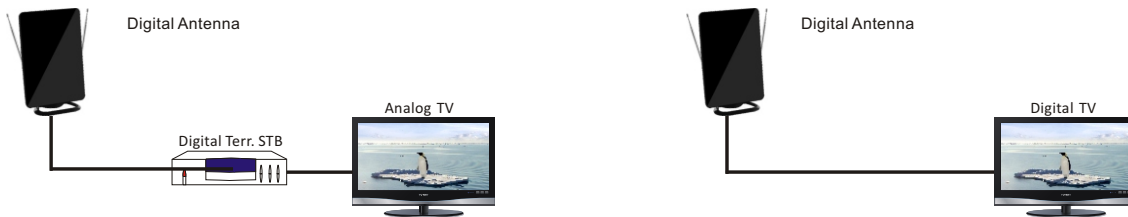

**Product Features:**

SMD circuit technology design  
 Shielded for minimum interference  
 Excellent reception for digital, free view and analog TV signals  
 Stylish and slim flat-panel design with shiny black mirror surface finish  
 Specially compatible with HDTV of various digital terrestrial signals

**Setting And Connections :**

Mount the bracket onto the antenna.  
 Connect the antenna coaxial cable to set-top box or TV with digital TV ready.  
 After the connections have been done properly, turn on the television, set on and select a TV program, then adjust the antenna vertically or horizontally and move it for the best signal reception positioning.

**Operation Instruction:**

- For the best reception, please check the following conditions.
1. Keep the antenna away from the sources of interference and those big power consumption devices, such as air conditioner, elevator, hair dryer and microwave oven, etc.
  2. Place the antenna near the windows under indoor environment.
  3. In digital terrestrial reception, interceptions between antenna and transmission tower will cause signal loss temporarily. Please install the antenna as high as possible to reduce interceptions.
