

Rubber-Flex collets

Accessories for Tapmatic thread cutting apparatus

Application:

For drill bits and screw taps with straight shank (Tapmatic thread cutters).

Version:

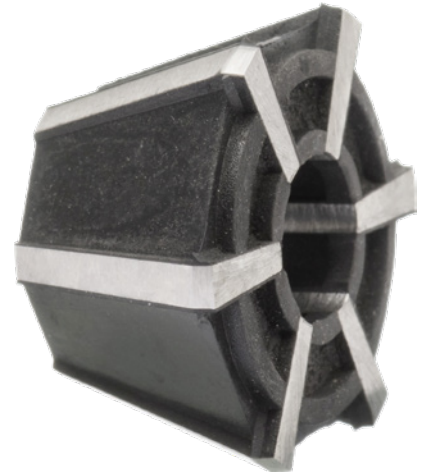

- Clamping segments are securely attached with special rubber.
- Clamping segments move in parallel along the complete clamping range.
- High radial clamping force
- Tool shank is clamped along the entire length of the hole.

Advantage:

- Centric and precise clamping within the entire clamping range.
- Concentricity properties remain constant even with tolerance clamping.
- Concentricity properties remain constant even with tolerance clamping

Delivery:

1x Rubber Flex collet chuck.

Art. no.	21655 020
Collet type	J 116
Min./max. clamping range	2.5-4.5 mm
