

forklift dirt-trapping mat

removes moisture and dirt from wheels

Application:

forklifts bring in a lot of dirt and moisture when driven into a building from outside. as well as the associated cleanliness issues, there is also a risk of slipping and falls. the forklift mat is designed to absorb and retain dirt and moisture, creating a safe and clean working environment. the mats are easy to install and do not slip out of place under heavy forklift traffic.

Execution:

- bi-level surface effectively removes moisture and dirt from forklift wheels to improve safety around forklift trucks
- modular mats are easy to install and scalable to the application
- polypropylene mat is easy to clean and quick drying
- tough rubber carrier and polypropylene carpet layer withstand pallet truck traffic up to 6.3 tonnes
- recommended for buildings which forklift trucks drive into from the outside
- colour: charcoal
- weight approx. 5 kg / m²

Art. no.	50225 880
Manufacturer Part Number	4253
Colour	Black
Width	180 cm
Gross Weight	11.340 kg
Product Group	5AD

EAN
