

## PRODUCT PROFILE

## Secure Digital Cards

While SD cards began primarily as a consumer storage medium, the form factor has gained increasing traction in the industrial and OEM sectors due to the small size, low power consumption and ease of integration. Delkin Devices offers a menu of full-size SD cards, allowing the best product selection to match any application. Delkin SD products have many additional benefits over standard retail consumer-grade cards, including BOM control and life cycle management.

Whether the application calls for a few Megabytes of storage to launch an application, or several Gigabytes to store video data, Delkin has the solution.

For the most demanding applications, in terms of environmental conditions, write-intensive workload or the mission-critical nature of the stored data, Delkin offers true industrial SD controllers, high endurance SLC NAND flash, full industrial temperature range and long life cycles.

For more cost sensitive designs, Delkin offers lines of MLC-based cards – the Utility family in standard SD (-25°C to +85°C) and Utility+ family offering full industrial (-40°C to +85°C) temperature ranges.

Regardless of the SD product family, Delkin ensures consistent performance and host compatibility through

## HIGHLIGHTS

Four SD Product Families

- SLC and MLC Flash
- Commercial & Industrial Temp
- SD 3.0 & SD 2.0

Wide Range of Capacities from 128MB to 128GB

Support for SD and SPI Modes

Controlled BOM

Life Cycle Management

managed configurations. Delkin locks the card configuration down to the specific controller, firmware and flash chips, with a change to any of these components dictating a new part number. When an unavoidable EOL occurs to any of these items, Delkin communicates the discontinuation in advance, providing the opportunity to place a last time buy as well as to qualify the replacement solution.

Additionally, since the Delkin Devices facility in Poway, California is the headquarters for our design, manufacturing and support teams, we can also provide customized SD solutions. Options include custom labels, content or image loading, conformal coating or other mechanical modifications to meet a specific need. Contact us to ask how a card can be customized for your application.
