

Pipe brushes with M 6 male thread, brass wire trim

For manual or machine use

ATORN®

Application

For cleaning pipes, gratings, sleeves and cylinders and for deburring e.g. cross-drilled holes and similar features

Version

- Edging: Brass wire, crimped
- With M6 connecting thread for handle, extensions or adapter
- Machine use possible with adapter: Up to max. 3000 rpm (rotation speed) – use brush clockwise!
- Longest service life thanks to top wire quality
- Optimal flexibility and bending strength
- Uniform distribution of the filling wire ensures a high level of concentricity.

Art. No.	56742 220
Material of the wire	Brass
Diameter	20 mm
Filling length	80 mm
Length	115 mm
