Deutsch Size 20 Contacts

Size 20 solid pins and sockets engineered to accept 16-18 AWG wire

The new size 20 contacts provide versatility within the Deutsch common contact system. The contacts feature a size 20 mating interface and a 16-18 AWG crimp barrel to accept larger wire while mating with any Deutsch Industrial size 20 contact.

Plating options include nickel or gold for added design flexibility. Gold contacts are ideal for applications where there is less than 5 volts or when higher mating cycles are required.

A purple stripe distinguishes these size 20 contacts from other size 20 contacts.

Contact Performance Specifications

Part Numbers		Wire Size AWG [mm ²]	Strip Length Inches [mm]	Crimp Tensile Lbs. [N]	Rated Amps at 125° C Continuous
Pin	Socket				
0460-010-20**	0462-005-20**	16-18 [1.0-0.75]	.156-.218 [3.96-5.54]	20 [89]	7.5

** = 141 for nickel plating, or 31 for gold plating
