Enabling The Next Generation Of 4K Systems & Beyond

Do you have an HD TV or computer monitor and need a cost-effective but quality HDMI connection cable?

The exciting new range of LMS Data classic grade HDMI cables conform to the latest HDMI version 2.0 standard, enabling blistering digital data transfers up to around 18Gbps*.

Giving superior image and audio resolution when compared to your existing 1.4 or lower spec HDMI cables, fully realise 4K resolutions at 60 frames per second (FPS) together with improved 3D imaging capability, extended 32-channel audio support together with an enhanced audio resolution up to around 1536Khz.

Available in popular lengths including 1, 2, 3, 5, 10 and 15 metre lengths. Robust in build quality with the longer lengths ideal for gigabit ethernet switch stacking, being an ideal and cost-effective alternative to the more expensive ethernet stacking options from other vendors.

specifications:

Classic HDMI Signalling Cables - Price Competitive

Improved 4K UHD support - up to 18Gbps @ 60FPS

(Up to around 7 metres, above 7 metres, around 30FPS)

Improved 3D and HD audio support - up to 32-channels

Ideal for 4K gaming, 4K media centres and studios

Ideal for gigabit ethernet switch stacking**

Low-loss gold-plated HDMI connectors

Choice of lengths: 1, 2, 3, 5, 10, 15 metre options

* Check your hardware first
** Switches must use HDMI stack ports
