# EVK9FGV1005Q5

Evaluation Kit for 9FGV1005 Programmable PhiClock™ Generator with Internal 50MHz Crystal

This is the evaluation board for the 9FGV1005Q5 programmable PhiClock™ generator with internal 50MHz crystal. It provides a convenient way of configuring and programming the blank parts for the 9FGV1005Q5 device. With the on-board USB interface, the IDT Timing Commander™ GUI can communicate to the device for configuration and frequency validation.

Features

- USB powered
- USB cable
- Board is USB 2.0/3.0 compatible
- Free Timing Commander™ software
