

Cable Duct AS-i 3.0 Motor Modules for two 24 V Motorized Rollers Interroll (EC310) resp. RULMECA (RDR BL-2)

- AS-i and AUX via M8 connectors
- AS-i and AUX via profile cable

Flat design, optimized for use in cable channels

Inputs and Outputs in one module

Speed setting via AS-i parameters

(1) **Interroll (EC310), RULMECA (RDR BL-2):**

Motor module to control 24 V motorized rollers Interroll Typ EC310 or RULMECA Typ RDR BL-2.

(2) **yes, separately for each motor, 3,5 A (slow-blow fuse):**

In the motor module UL approved fuses are placed before each of the motor supply connections. A short circuit in the motor causes this fuse to blow, protecting the connection cable between the module and motor.

After blowing the fuse the module is no longer functional and needs to be replaced. The characteristics of the fuse must be checked against the motor data before using the module.

The protection circuit in the module allows a very simple protection of the motor cables. The fuse for the cable protection is a slow-blow one; without short circuit the robust behavior of the module remains.

(3) **Input voltage (sensor supply):**

Inputs are supplied by AS-i or by AUX (auxiliary 24 V power). If supplied by AS-i, inputs shall not be connected to earth or to external potential.

(4) **Output voltage (actuator supply):**

Outputs are supplied by AS-i or by AUX (auxiliary 24 V power). If supplied by AS-i, outputs shall not be connected to earth or to external potential.

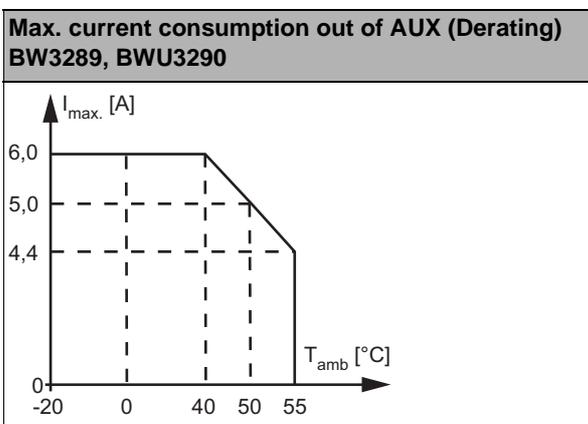

(5) **AS-i connection:**

The connection to AS-i as well to AUX (auxiliary 24 V power) is made via yellow resp. black AS-i profile cable with piercing technology or via M8 socket.

General data		
Roller drives	2 x Interroll (EC310) or 2 x RULMECA (RDR BL-2)	
Connection		
AS-i/AUX connection	profile cable and piercing	M8
Periphery connection	M8	
AS-i		
Profile	S-7.A.7, ID1 = 7 (fixed)	
Address	1 AB slave	
Required Master profile	≥M4	
As of AS-i specification	3.0	
Operating voltage	30 V (18 ... 31.6 V)	
Max. current consumption	200 mA	
AUX		
Operating voltage	24 V (18 ... 30V)	
Max. current consumption	6 A continuously, 11 A peak ⁽¹⁾	
Input		
Number	2 x sensor inputs + 2 x motor fault inputs	
Power supply	sensor inputs: out of AS-i motor fault inputs: out of AUX	
Power supply of attached sensors	100 mA ⁽²⁾	
Switching threshold	U _{in} < 5 V (low) U _{in} > 15 V (high)	
Output		
Number (digital)	2	
Number (analog)	2	
Power supply	out of AUX (galvanic separation)	
Overvoltage tolerated by reaction (AUX)	35 V resistant brake resistor compatible	
Max. output current	10 mA per output, in sum 40 mA at T _{amb} ≤ 50 °C, 25 mA at T _{amb} > 50 °C	
Motor supply	out of AUX, 3 A continuously, 5,5 A max.	
Line protection fuse	yes, separately for each motor, 3.5 AT, at 7 A (200%) release between 1 s and 120 s, fuse UL certified ⁽³⁾	
Display		
LED I1 ...I _x (yellow)	state of inputs I1, I2	
LED M1, M2 (yellow)	state of outputs M1 (O1), M2 (O3)	
LED ASI (green)	on: AS-i voltage on off: no AS-i voltage	
LED AUX (green)	on: 24 V _{DC} AUX off: no 24 V _{DC} AUX	
LED FLT/FAULT (red)	on: slave address 0 or slave offline flashing: AUX voltage is missing, overload output, an output is short circuited, at least one motor fuse has blown or overload sensor off: slave online	
UL-specifications (UL 61010-1 and UL 61010-2-201)		
External protection	an isolated source with a secondary open circuit voltage of ≤30 V _{DC} with a 3 A maximum over current protection. Over current protection is not required when a Class 2 source is employed.	

Article No.	BWU3290	BW3289
Environment		
Applied standards	EN 61000-6-2 EN 61000-6-4 EN60529	
Operating altitude	max. 2000 m	
Ambient temperature	-5 °C ... +40 °C (non-condensing) (-5 °C ... +55 °C at max. 4,4 A current consumption) ^{(1) (4)}	
Storage temperature	-25 °C ... +85 °C	
Housing	plastic, screw mounting	
Protection category	IP54	
Weight	module: 200 g passive distributor: 75 g	module: 200 g
Dimensions (W / H / D) in mm	module: 90 / 60 / 18 passive distributor: 60 / 45 / 19	module: 90 / 60 / 18
