

## Drawer

### Application:

Storage with drawers: Storage of small parts in drawers not only has the advantage of being optimally protected against dust and contamination compared to shelf storage, but also saves space and provides more clarity. A handle allows you to see the contents of the entire drawer, while on a shelf you may have to slide objects aside or over them.

### Execution:

- Full scale: maximum horizontal space utilisation, full overview, optimum access
- Drawer protection standard: Standard version including single drawer lock
