

Product Change Notification – 2022/44

Product Line:	powerCON	Part No:	NAC3MPXXA*
Piece Part:	Chassis Cover	Part No:	1014286 1014251
Engineering Change Request:	2022-0908 2022-0910	Date:	21 March 2023
Comments:	Change of material		
Affected products:	NAC3MPXXA NAC3MPXXA-I NAC3MPXXA-SB NAC3MPXXA-WOT		
First shipment of modified product:	Q11		

Engineering Change Notice

Due to supply chain constraints of certain additives, we decided to change the compound material of the products listed above to an alternative UL recognized material. The compound material remains to be Polyamid 66 and is technically identical. Internal tests and external certifications proof that the product performance remain unchanged. The article numbers of the products remain unchanged. Traceability is ensured by the production code.

OLD

NEW

As you can see on the pictures above, the blue color will change significantly. The reason for this is that the blue color pigments previously used are no longer available. Hence, for the future the NEUTRIK powerCON inlet have the new blue color as pictured on the right hand side.

To avoid mixing old with new products in the market, the FIFO method (first in, first out) must be used in warehousing.
