

	REVISED	DR	APP

0

Due to the flat and fanless design of notebooks, ultrabooks, tablets or handhelds consoles, multimedia and computing interfaces will outsourced to external docking devices.

Many devices uses here the USB-C interface. USB-C works bidirectionally it can send data and receive it.

- The USB-C dock 4in1 contains:
- a HDMI jack for resolutions up to 4K at 30Hz
  - a VGA jack for FullHD resolutions (1080p)
  - a USB-A jack for data transmission up to 5Gbps
  - a USB-C charging jack for PowerDelivery up to 87W

If you use both video outputs (HDMI + VGA) at the same time, only mirror mode (desktop mirroring) can be used. The same image will then appear on all 3 displays, including your Notebook display. The resolution is then automatically set to the level that all 3 displays support (m 1080p). To extend your display (desktop extending), please choose only one video outpu

You connect the dock to a free USB-C jack and you can use both features simultaneously. Drivers are installed automatically from operating system.

- Connections: USB-C plug
- Interfaces: HDMI-A jack, VGA jack, USB-A jack, USB-C jack
- HDMI-A jack: up to 3840x2160/30Hz, 2560x1440/60Hz (HDMI 1.4)
  - » Here you can connect an external monitor, TV or video projector
- VGA jack: up to 1920x1080/60Hz
  - » Here you can connect an external monitor, TV or video projector
- USB-A jack: up to 5Gbps (USB 3.0/3.1 Gen 1/3.2 Gen 1, SuperSpeed USB)
  - » Here you can connect external peripheral devices or mass storage devices
- USB-C jack: up to 87 watts PD input (PowerDelivery)
  - » Here you can connect your USB-C power supply
- Features: Plug & Play, wide compatibility because of high class chipsets,
