Communication interface  
 **IO-Link**

- Practical design**
- Compact design 30x30 mm
  - Degree of protection IP40
  - Weight reduction with QS4

- Universal pressure measurement**
- Pressure and vacuum
  - 13 pressure measuring ranges
  - All standard pressure units
  - Optional test report

- Easy operation**
- Clear 2-line display
  - Configurable red surround for the entire display
  - Intuitive menu navigation

- Quick installation**
- L1 plug for fast commissioning
  - M8 electrical adapters allow maximum flexibility
  - Wide range of mounting options
  - QS4 quick connector

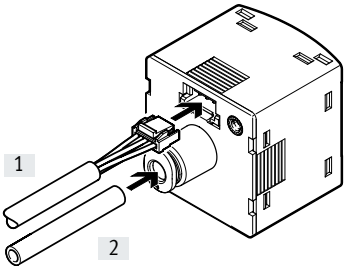

- Switchable electrical outputs**
- Various switching functions
  - Switching outputs (PNP/NPN, NO/NC)
  - Analogue outputs (0 ... 10 V, 1 ... 5 V, 4 ... 20 mA)

Product description	Areas of application	Functions	Variants with IO-Link
<p>The pressure sensor SPAN is suitable for monitoring compressed air and non-corrosive gases. The sensor can be used in many industries thanks to its compact design. The measuring method is based on a piezoresistive measuring cell for relative pressure measurement. The pressure value is transmitted to the connected controller as a switching signal, as an analogue signal or via IO-Link depending on the sensor variant and selected parameters.</p>	<ul style="list-style-type: none"><li>• Network monitoring (pressure present)</li><li>• Regulator monitoring (pressure in the setpoint range)</li><li>• Vacuum (part picked up)</li><li>• Leak test (pressure drop over time)</li><li>• Object detection (back pressure present)</li></ul>	<ul style="list-style-type: none"><li>• Monitoring and setting a pressure threshold, a pressure range or differential pressure monitoring with teach-in function or by entering values</li><li>• ECO function with option to switch off the display</li><li>• Optional security code can be freely chosen (4-digit code)</li><li>• Adjustable low-pass filter to smooth the pressure signal</li><li>• Scaling the analogue output to increase the signal dynamics</li><li>• Offset compensation possible</li><li>• Min./max. value memory for monitoring compressed air</li><li>• All settings that have been carried out on one sensor (master) can be transferred (replication) to identical sensors (device)</li></ul>	<ul style="list-style-type: none"><li>• Serial communication integrated using IO-Link 1.1</li><li>• Cyclical transfer of two operating statuses and the measured pressure value</li><li>• The sensor can be parameterised remotely using an IO-Link Master</li><li>• Sensor can be changed easily using automatic parameterisation (hot swap)</li><li>• Sensor identification, diagnostics and teach-in via IO-Link possible</li></ul>

## Data sheet

Variant with IO-Link and analogue outputs ... -PNLK-PNVBA

Variant with 2 switching outputs ... -PN-PN

- Compact design 30x30
- 13 pressure measuring ranges  
-1 ... +16 bar available
- Voltage 15 ... 30 V DC
- Temperature range 0 ... +50°C
- Degree of protection IP40
