

K-LED double spot illuminator

Application:

For flexible and pinpoint incident light tasks in microscopy.

Version:

- Flexible gooseneck arms
- Two high-quality LED spots
- 2x thread (M24 x 0.5) for polariser
- Height-adjustable

Advantage:

- Homogeneous, neutral white light, continuous brightness control via a rotary switch on the microscope stand or via a K-LED controller.

Art. no.	41613 715
Number of arms	2
Arm length	160 mm
Lamp type	LED
