

# Safety Data Sheet according to (EC) No 1907/2006 as amended

Page 1 of 18

SDS No.: 152853 V009.1

Revision: 31.08.2023

printing date: 17.01.2024

Replaces version from: 12.08.2022

LOCTITE SI 5999 known as 5999 GREY

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

#### 1.1. Product identifier

LOCTITE SI 5999 known as 5999 GREY

#### 1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use:

Silicone sealant

## 1.3. Details of the supplier of the safety data sheet

Henkel Ltd

Adhesives

Wood Lane End

HP2 4RQ Hemel Hempstead

Great Britain

Phone: +44 (1442) 278000

ua-productsafety.uk@henkel.com

For Safety Data Sheet updates please visit our website https://mysds.henkel.com/index.html#/appSelection or www.henkel-adhesives.com.

### 1.4. Emergency telephone number

24 Hours Emergency Tel: +44 (0)1442 278497

# **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

### Classification (CLP):

Serious eye damage Category 1

H318 Causes serious eye damage.

Skin sensitizer Category 1

H317 May cause an allergic skin reaction.

Carcinogenicity Category 1B

H350 May cause cancer.

Specific target organ toxicity - single exposure Category 2

H371 May cause damage to organs.

#### 2.2. Label elements

## Label elements (CLP):

### Hazard pictogram:

Contains

Silicon compounds

2-butanone oxime

Signal word: Danger

**Hazard statement:** H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H350 May cause cancer.

H371 May cause damage to organs.

**Supplemental information** Restricted to professional users.

**Precautionary statement:** P201 Obtain special instructions before use.

**Prevention** P280 Wear protective gloves/protective clothing/eye protection/face protection.

**Precautionary statement:** P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

**Response** contact lenses, if present and easy to do. Continue rinsing.

P308+P313 IF exposed or concerned: Get medical advice/attention. P333+P313 If skin irritation or rash occurs: Get medical advice/attention.

### 2.3. Other hazards

None if used properly.

This mixture contains components considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB).

Following substances are present in a concentration ≥ the concentration limit for depiction in Section 3 and fulfill the criteria for PBT/vPvB, or were identified as endocrine disruptor (ED):

| _ |                              |          |
|---|------------------------------|----------|
| I | octamethylcyclotetrasiloxane | PBT/vPvB |
| ı | 556-67-2                     |          |

# **SECTION 3: Composition/information on ingredients**

#### 3.2. Mixtures

### Declaration of the ingredients according to CLP (EC) No 1272/2008:

| Hazardous components CAS-No. EC Number REACH-Reg No.  | Concentration                                 | Classification   | Specific Conc. Limits, M-<br>factors and ATEs    | Add.<br>Information |
|---|---|--|--|---------------------|
| Silicon compounds   | 1- < 5 %                                      | Skin Sens. 1, H317<br>Eye Dam. 1, H318<br>STOT RE 2, H373  |  |                     |
| Silica, surface treated with<br>Hexamethyldisilazane - Nano<br>7631-86-9<br>272-697-1<br>01-2119379499-16 | 1-< 5 %                                       | STOT RE 2, Inhalation, H373  |  |                     |
| 2-butanone oxime<br>96-29-7<br>202-496-6<br>01-2119539477-28  | 1- < 3 %                                      | STOT SE 3, H336<br>STOT RE 2, H373<br>Skin Irrit. 2, H315<br>Eye Dam. 1, H318<br>STOT SE 1, H370<br>Skin Sens. 1, H317<br>Carc. 1B, H350<br>Acute Tox. 3, Oral, H301<br>Acute Tox. 4, Dermal, H312 | dermal:ATE = 1.100 mg/kg<br>oral:ATE = 100 mg/kg |                     |
| octamethylcyclotetrasiloxane<br>556-67-2<br>209-136-7<br>01-2119529238-36                                 | 0,0025-< 0,025<br>%<br>( 25 ppm-< 250<br>ppm) | Aquatic Chronic 1, H410<br>Repr. 2, H361f<br>Flam. Liq. 3, H226  | M chronic = 10                                   | SVHC<br>PBT/vPvB    |

If no ATE values are displayed, please refer to LD/LC50 values in Section 11. For full text of the H - statements and other abbreviations see section 16 "Other information".

## **SECTION 4: First aid measures**

# 4.1. Description of first aid measures

Inhalation:

Move to fresh air. If symptoms persist, seek medical advice.

Skin contact:

Rinse with running water and soap.

Obtain medical attention if irritation persists.

Eye contact:

Rinse immediately with plenty of running water (for 10 minutes), seek medical attention from a specialist.

Ingestion:

Rinse mouth, drink 1-2 glasses of water, do not induce vomiting, consult a doctor.

### 4.2. Most important symptoms and effects, both acute and delayed

SKIN: Rash, Urticaria.

After eye contact: Corrosive, may cause permanent damage to eyes (impairment of vision).

## 4.3. Indication of any immediate medical attention and special treatment needed

See section: Description of first aid measures

# **SECTION 5: Firefighting measures**

**5.1. Extinguishing media Suitable extinguishing media:**water, carbon dioxide, foam, powder

### Extinguishing media which must not be used for safety reasons:

High pressure waterjet

### 5.2. Special hazards arising from the substance or mixture

In the event of a fire, carbon monoxide (CO), carbon dioxide (CO2) and nitrogen oxides (NOx) can be released. Silicon dioxide

### 5.3. Advice for firefighters

Wear self-contained breathing apparatus and full protective clothing, such as turn-out gear.

### **Additional information:**

In case of fire, keep containers cool with water spray.

## **SECTION 6: Accidental release measures**

### 6.1. Personal precautions, protective equipment and emergency procedures

Avoid contact with skin and eyes.

Wear protective equipment.

Ensure adequate ventilation.

#### **6.2.** Environmental precautions

Do not empty into drains / surface water / ground water.

#### 6.3. Methods and material for containment and cleaning up

Dispose of contaminated material as waste according to Section 13.

Scrape up as much material as possible.

Sweep up spilled material. Avoid creating dust.

Store in a partly filled, closed container until disposal.

#### 6.4. Reference to other sections

See advice in section 8

# **SECTION 7: Handling and storage**

## 7.1. Precautions for safe handling

Avoid skin and eye contact.

See advice in section 8

#### Hygiene measures:

Good industrial hygiene practices should be observed.

Wash hands before work breaks and after finishing work.

Do not eat, drink or smoke while working.

#### 7.2. Conditions for safe storage, including any incompatibilities

Ensure good ventilation/extraction.

Store in a cool, well-ventilated place.

Refer to Technical Data Sheet

Never allow product to get in contact with water during storage

## 7.3. Specific end use(s)

Silicone sealant

# **SECTION 8: Exposure controls/personal protection**

# 8.1. Control parameters

# Occupational Exposure Limits

Valid for

Great Britain

| Ingredient [Regulated substance]   | ppm | mg/m <sup>3</sup> | Value type                      | Short term exposure limit category / Remarks | Regulatory list |
|--|-----|-------------------|---------------------------------|--|-----------------|
| Calcium carbonate 471-34-1 [CALCIUM CARBONATE, INHALABLE DUST]                           |     | 10                | Time Weighted Average (TWA):    |  | EH40 WEL        |
| Calcium carbonate 471-34-1 [CALCIUM CARBONATE, RESPIRABLE DUST]                          |     | 4                 | Time Weighted Average<br>(TWA): |  | EH40 WEL        |
| Calcium carbonate<br>471-34-1<br>[LIMESTONE, RESPIRABLE<br>MARBLE, RESPIRABLE]           |     | 4                 | Time Weighted Average<br>(TWA): |  | EH40 WEL        |
| Calcium carbonate<br>471-34-1<br>[LIMESTONE, TOTAL INHALABLE<br>MARBLE, TOTAL INHALABLE] |     | 10                | Time Weighted Average (TWA):    |  | EH40 WEL        |

## **Biological Exposure Indices:**

None

# 8.2. Exposure controls:

Engineering controls:

Ensure good ventilation/extraction.

Respiratory protection:

Ensure adequate ventilation.

An approved mask or respirator fitted with an organic vapour cartridge should be worn if the product is used in a poorly ventilated area

Dust mask, P2 particle filter.

Hand protection:

Chemical-resistant protective gloves (EN 374).

Suitable materials for short-term contact or splashes (recommended: at least protection index 2, corresponding to > 30 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

Suitable materials for longer, direct contact (recommended: protection index 6, corresponding to > 480 minutes permeation time as per EN 374):

nitrile rubber (NBR; >= 0.4 mm thickness)

This information is based on literature references and on information provided by glove manufacturers, or is derived by analogy with similar substances. Please note that in practice the working life of chemical-resistant protective gloves may be considerably shorter than the permeation time determined in accordance with EN 374 as a result of the many influencing factors (e.g. temperature). If signs of wear and tear are noticed then the gloves should be replaced.

Eve protection:

Safety glasses with sideshields or chemical safety goggles should be worn if there is a risk of splashing. Protective eye equipment should conform to EN166.

Skin protection:

Wear suitable protective clothing.

Protective clothing should conform to EN 14605 for liquid splashes or to EN 13982 for dusts.

Advices to personal protection equipment:

The information provided on personal protective equipment is for guidance purposes only. A full risk assessment should be conducted prior to using this product to determine the appropriate personal protective equipment to suit local conditions. Personal protective equipment should conform to the relevant EN standard.

## **SECTION 9: Physical and chemical properties**

#### 9.1. Information on basic physical and chemical properties

Delivery form paste
Colour grey
Odor Odorless
Physical state solid

Melting point > 400 °C (> 752 °F)

Solidification temperature Not applicable, Product is a solid.

Initial boiling point  $> 200 \,^{\circ}\text{C} (> 392 \,^{\circ}\text{F})$ 

Flammability The product is not flammable.
Explosive limits Not applicable, Product is a solid.
Flash point Not applicable, Product is a solid.
Auto-ignition temperature Not applicable, Product is a solid.

Decomposition temperature > 100 °C (> 212 °F); Substance/mixture is not self-reactive, no

organic peroxide and does not decompose under foreseen conditions

of use 7 - 9

(20 °C (68 °F); Conc.: 100 % product; Solvent:

None)

Viscosity (kinematic) Not applicable, Product is a solid.

Viscosity, dynamic Not determined

 $\cap$ 

Solubility (qualitative) Polymerises in presence of water.

(20 °C (68 °F); Solvent: Water) Partition coefficient: n-octanol/water

Vapour pressure (20 °C (68 °F))

1,44 - 1,49 g/cm3

Not applicable

(20 °C (68 °F))

Bulk density 1,3 g/cm<sup>3</sup>

Relative vapour density: Not applicable, Product is a solid.

Particle characteristics Not applicable, mixture is a paste.

#### 9.2. Other information

Density

Other information not applicable for this product

# **SECTION 10: Stability and reactivity**

### 10.1. Reactivity

Reacts with oxidants, acids and lyes

### 10.2. Chemical stability

Stable under recommended storage conditions.

### 10.3. Possibility of hazardous reactions

See section reactivity

### 10.4. Conditions to avoid

Stable under normal conditions of storage and use.

Excessive heat.

## 10.5. Incompatible materials

See section reactivity.

### 10.6. Hazardous decomposition products

None if used for intended purpose.

# **SECTION 11: Toxicological information**

## General toxicological information:

Methylethyl ketoxime released during polymerisation of oxime curing RTV silicones is irritating to the respiratory system Methylethyl ketoxime released during polymerisation of oxime curing silicones. It is harmful in contact with skin and is a skin sensitizer.

### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

# Acute oral toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances      | Value    | Value         | Species | Method  |
|---------------------------|----------|---------------|---------|---|
| CAS-No.                   | type     |               |         |   |
| Silicon compounds         | LD50     | > 2.000 mg/kg | rat     | OECD Guideline 401 (Acute Oral Toxicity)                |
| Silica, surface treated   | LD50     | > 5.000 mg/kg | rat     | OECD Guideline 401 (Acute Oral Toxicity)                |
| with                      |          |               |         |   |
| Hexamethyldisilazane -    |          |               |         |   |
| Nano                      |          |               |         |   |
| 7631-86-9                 |          |               |         |   |
| 2-butanone oxime          | Acute    | 100 mg/kg     |         | Expert judgement  |
| 96-29-7                   | toxicity |               |         |   |
|                           | estimate |               |         |   |
|                           | (ATE)    |               |         |   |
| octamethylcyclotetrasilox | LD50     | > 4.800 mg/kg | rat     | equivalent or similar to OECD Guideline 401 (Acute Oral |
| ane                       |          |               |         | Toxicity)   |
| 556-67-2                  |          |               |         |   |

## Acute dermal toxicity:

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

| Hazardous substances      | Value    | Value         | Species | Method   |
|---------------------------|----------|---------------|---------|--|
| CAS-No.                   | type     |               |         |  |
| Silicon compounds         | LD50     | > 2.000 mg/kg | rat     | OECD Guideline 402 (Acute Dermal Toxicity)         |
| Silica, surface treated   | LD50     | > 5.000 mg/kg | rabbit  | not specified                                      |
| with                      |          |               |         |  |
| Hexamethyldisilazane -    |          |               |         |  |
| Nano                      |          |               |         |  |
| 7631-86-9                 |          |               |         |  |
| 2-butanone oxime          | Acute    | 1.100 mg/kg   |         | Expert judgement                                   |

| octamethylcyclotetrasiloxane 556-67-2                                    | NOEC  | 0,0044 mg/l                 | 93 d          | Salmo gairdneri (new name:<br>Oncorhynchus mykiss) | EPA OPPTS 797.1600 (Fish<br>Early Life Stage Toxicity<br>Test)         |
| octamethylcyclotetrasiloxane 556-67-2                                    | LC50  | Toxicity > Water solubility | 96 h          | Oncorhynchus mykiss                                | EPA OTS 797.1400 (Fish<br>Acute Toxicity Test)                         |

## **Toxicity (aquatic invertebrates):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances         | Value | Value            | Exposure time | Species       | Method                      |
|------------------------------|-------|------------------|---------------|---------------|-----------------------------|
| CAS-No.                      | type  |                  |               |               |                             |
| Silica, surface treated with | EC50  | > 1.000 mg/l     | 24 h          | Daphnia magna | OECD Guideline 202          |
| Hexamethyldisilazane - Nano  |       |                  |               |               | (Daphnia sp. Acute          |
| 7631-86-9                    |       |                  |               |               | Immobilisation Test)        |
| 2-butanone oxime             | EC50  | > 500 mg/l       | 48 h          | Daphnia magna | EU Method C.2 (Acute        |
| 96-29-7                      |       |                  |               |               | Toxicity for Daphnia)       |
| octamethylcyclotetrasiloxane | EC50  | Toxicity > Water | 48 h          | Daphnia magna | EPA OTS 797.1300            |
| 556-67-2                     |       | solubility       |               |               | (Aquatic Invertebrate Acute |
|                              |       |                  |               |               | Toxicity Test, Freshwater   |
|                              |       |                  |               |               | Daphnids)                   |

## Chronic toxicity (aquatic invertebrates):

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances   | Value | Value      | Exposure time | Species | Method   |
|--|-------|------------|---------------|---------|--|
| CAS-No.  | type  |            |               |         |  |
| Silica, surface treated with<br>Hexamethyldisilazane - Nano<br>7631-86-9 | NOEC  | 132,7 mg/l | 21 d          |         | OECD 211 (Daphnia magna, Reproduction Test)            |
| 2-butanone oxime<br>96-29-7  | NOEC  | > 100 mg/l | 21 d          | 1 0     | OECD 211 (Daphnia<br>magna, Reproduction Test)         |
| octamethylcyclotetrasiloxane 556-67-2                                    | NOEC  | 7.9 μg/l   | 21 d          | - T     | EPA OTS 797.1330<br>(Daphnid Chronic Toxicity<br>Test) |

## Toxicity (Algae):

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances                  | Value | Value            | Exposure time | Species                        | Method                    |
|---------------------------------------|-------|------------------|---------------|--------------------------------|---------------------------|
| CAS-No.                               | type  |                  |               |                                |                           |
| Silica, surface treated with          | EC50  | > 173,1 mg/l     | 72 h          |                                | OECD Guideline 201 (Alga, |
| Hexamethyldisilazane - Nano 7631-86-9 |       |                  |               |                                | Growth Inhibition Test)   |
| Silica, surface treated with          | NOEC  | 173,1 mg/l       | 72 h          | Desmodesmus subspicatus        | OECD Guideline 201 (Alga, |
| Hexamethyldisilazane - Nano           |       |                  |               | _                              | Growth Inhibition Test)   |
| 7631-86-9                             |       |                  |               |                                |                           |
| 2-butanone oxime                      | EC50  | 11,8 mg/l        | 72 h          | Scenedesmus capricornutum      | OECD Guideline 201 (Alga, |
| 96-29-7                               |       |                  |               |                                | Growth Inhibition Test)   |
| 2-butanone oxime                      | NOEC  | 2,56 mg/l        | 72 h          | Scenedesmus capricornutum      | OECD Guideline 201 (Alga, |
| 96-29-7                               |       |                  |               |                                | Growth Inhibition Test)   |
| octamethylcyclotetrasiloxane          | EC50  | Toxicity > Water | 96 h          | Selenastrum capricornutum      | EPA OTS 797.1050 (Algal   |
| 556-67-2                              |       | solubility       |               | (new name: Pseudokirchneriella | Toxicity, Tiers I and II) |
|                                       |       |                  |               | subcapitata)                   |                           |
| octamethylcyclotetrasiloxane          | EC10  | 0,022 mg/l       | 96 h          | Selenastrum capricornutum      | EPA OTS 797.1050 (Algal   |
| 556-67-2                              |       |                  |               | (new name: Pseudokirchneriella | Toxicity, Tiers I and II) |
|                                       |       |                  |               | subcapitata)                   |                           |

## **Toxicity (microorganisms):**

The mixture is classified based on calculation method referring to the classified substances present in the mixture.

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.  | Value<br>type | Value                       | Exposure time | Species   | Method  |
|--|---------------|-----------------------------|---------------|---|---|
| Silica, surface treated with<br>Hexamethyldisilazane - Nano<br>7631-86-9 | EC50          | > 2.500 mg/l                | 3 h           | activated sludge of a predominantly domestic sewage | OECD Guideline 209<br>(Activated Sludge,<br>Respiration Inhibition Test)          |
| 2-butanone oxime<br>96-29-7  | EC10          | 177 mg/l                    | 17 h          |   | DIN 38412, part 8<br>(Pseudomonas<br>Zellvermehrungshemm-<br>Test)                |
| octamethylcyclotetrasiloxane<br>556-67-2                                 | EC50          | Toxicity > Water solubility | 3 h           | activated sludge                                    | ISO 8192 (Test for<br>Inhibition of Oxygen<br>Consumption by Activated<br>Sludge) |

## 12.2. Persistence and degradability

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances         | Result                     | Test type | Degradability | Exposure | Method                          |
|------------------------------|----------------------------|-----------|---------------|----------|---------------------------------|
| CAS-No.                      |                            |           |               | time     |                                 |
| Silicon compounds            | not readily biodegradable. | aerobic   | 28 %          | 28 d     | OECD Guideline 301 C (Ready     |
|                              |                            |           |               |          | Biodegradability: Modified MITI |
|                              |                            |           |               |          | Test (I))                       |
| 2-butanone oxime             | inherently biodegradable   | aerobic   | 70 %          | 14 d     | OECD Guideline 302 B (Inherent  |
| 96-29-7                      |                            |           |               |          | biodegradability: Zahn-         |
|                              |                            |           |               |          | Wellens/EMPA Test)              |
| octamethylcyclotetrasiloxane | not readily biodegradable. | aerobic   | 3,7 %         | 29 d     | OECD Guideline 310 (Ready       |
| 556-67-2                     |                            |           |               |          | BiodegradabilityCO2 in Sealed   |
|                              |                            |           |               |          | Vessels (Headspace Test)        |

## 12.3. Bioaccumulative potential

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.       | Bioconcentratio<br>n factor (BCF) | Exposure time | Temperature | Species                | Method   |
|---------------------------------------|-----------------------------------|---------------|-------------|------------------------|--|
| 2-butanone oxime<br>96-29-7           | 0,5 - 0,6                         | 42 d          | 25 °C       | Oryzias latipes        | OECD Guideline 305 C<br>(Bioaccumulation: Test for the<br>Degree of Bioconcentration in<br>Fish) |
| octamethylcyclotetrasiloxane 556-67-2 | 12.400                            | 28 d          |             | Pimephales<br>promelas | EPA OTS 797.1520 (Fish<br>Bioconcentration Test-Rainbow<br>Trout)                                |

## 12.4. Mobility in soil

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.       | LogPow | Temperature | Method   |
|---------------------------------------|--------|-------------|--|
| 2-butanone oxime<br>96-29-7           | 0,65   | 25 °C       | OECD Guideline 107 (Partition Coefficient (n-octanol / water), Shake Flask Method) |
| octamethylcyclotetrasiloxane 556-67-2 | 6,98   | 21,7 °C     | other guideline:   |

#### 12.5. Results of PBT and vPvB assessment

The table below presents the data of the classified substances present in the mixture.

| Hazardous substances<br>CAS-No.  | PBT / vPvB  |
|--|---|
| Silica, surface treated with<br>Hexamethyldisilazane - Nano<br>7631-86-9 | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria. |
| 2-butanone oxime<br>96-29-7  | Not fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria. |
| octamethylcyclotetrasiloxane<br>556-67-2                                 | Fulfilling Persistent, Bioaccumulative and Toxic (PBT), very Persistent and very Bioaccumulative (vPvB) criteria.     |

### 12.6. Endocrine disrupting properties

not applicable

#### 12.7. Other adverse effects

No data available.

# **SECTION 13: Disposal considerations**

## 13.1. Waste treatment methods

Product disposal:

Do not empty into drains / surface water / ground water.

Dispose of in accordance with local and national regulations.

### Disposal of uncleaned packages:

After use, tubes, cartons and bottles containing residual product should be disposed of as chemically contaminated waste in an authorised legal land fill site or incinerated.

#### Waste code

08 04 09\* waste adhesives and sealants containing organic solvents and other dangerous substances

The valid EWC waste code numbers are source-related. The manufacturer is therefore unable to specify EWC waste codes for the articles or products used in the various sectors. The EWC codes listed are intended as a recommendation for users. We will be happy to advise you.

## **SECTION 14: Transport information**

## 14.1. UN number or ID number

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

## 14.2. UN proper shipping name

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

### 14.3. Transport hazard class(es)

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

## 14.4. Packing group

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

### 14.5. Environmental hazards

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

## 14.6. Special precautions for user

Not hazardous according to RID, ADR, ADN, IMDG, IATA-DGR.

## 14.7. Maritime transport in bulk according to IMO instruments

not applicable

## **SECTION 15: Regulatory information**

## 15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Ozone Depleting Substance (ODS) (Regulation (EC) No 1005/2009): Prior Informed Consent (PIC) (Regulation (EU) No 649/2012): Persistent organic pollutants (Regulation (EU) 2019/1021):

Not applicable Not applicable Not applicable

VOC content (2010/75/EC)

C content < 5 %

## 15.2. Chemical safety assessment

A chemical safety assessment has not been carried out.

## **SECTION 16: Other information**

The labelling of the product is indicated in Section 2. The full text

of all abbreviations indicated by codes in this safety data sheet are as follows:

H226 Flammable liquid and vapour.

H301 Toxic if swallowed.

H312 Harmful in contact with skin.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H336 May cause drowsiness or dizziness.

H350 May cause cancer.

H361f Suspected of damaging fertility.

H370 Causes damage to organs.

H373 May cause damage to organs through prolonged or repeated exposure.

H410 Very toxic to aquatic life with long lasting effects.

ED: Substance identified as having endocrine disrupting properties

EU OEL:

EU EXPLD 1:

Substance with a Union workplace exposure limit

EU EXPLD 1:

Substance listed in Annex I, Reg (EC) No. 2019/1148

EU EXPLD 2

Substance listed in Annex II, Reg (EC) No. 2019/1148

SVHC:

Substance of very high concern (REACH Candidate List)

PBT:

Substance fulfilling persistent, bioaccumulative and toxic criteria

PBT/vPvB: Substance fulfilling persistent, bioaccumulative and toxic plus very persistent and very

bioaccumulative criteria

vPvB: Substance fulfilling very persistent and very bioaccumulative criteria

#### **Further information:**

This Safety Data Sheet has been produced for sales from Henkel to parties purchasing from Henkel, is based on Regulation (EC) No 1907/2006 and provides information in accordance with applicable regulations of the European Union only. In that respect, no statement, warranty or representation of any kind is given as to compliance with any statutory laws or regulations of any other jurisdiction or territory other than the European Union. When exporting to territories other than the European Union, please consult with the respective Safety Data Sheet of the concerned territory to ensure compliance or liaise with Henkel's Product Safety and Regulatory Affairs Department (SDSinfo.Adhesive@henkel.com) prior to export to other territories than the European Union.

This information is based on our current level of knowledge and relates to the product in the state in which it is delivered. It is intended to describe our products from the point of view of safety requirements and is not intended to guarantee any particular properties.

## Dear Customer,

Henkel is committed to creating a sustainable future by promoting opportunities along the entire value chain. If you would like to contribute by switching from a paper to the electronic version of SDS, please contact the local Customer Service representative. We recommend to use a non-personal email address (e.g. SDS@your\_company.com).

Relevant changes in this safety data sheet are indicated by vertical lines at the left margin in the body of this document. Corresponding text is displayed in a different color on shadowed fields.
