Integrity® Cleanroom

Integrity® Mop Frame & Hardware

The Integrity® Mop Frame & Hardware is made of high-grade type 304 stainless steel, low profiled for easy cleaning in hard to reach areas. Industry leading design with quick squeeze, frame-locking mechanism allows for easy changing of mop and sponge heads. Continual surface contact at any angle permits mopping in "S" motion, accurately balanced for non-flipping. Swivel also locks into any position by tightening wing-nut.

FEATURES
• Quick squeeze, easy mop head changing mechanism
• Autoclavable at 121°C for 30 minutes
• Extremely durable stainless steel components
• 16" (40cm) x 5" (12.7cm) coverage area with a single pass
• Designed specifically for use in controlled environments
• Type 304 Stainless Steel

BENEFITS
• Mop frame compatible with polymer or stainless steel handles
• Impervious to most chemicals, will not rust, corrode or oxidize
