

**Collision protection for rack supports**  
Made of recycled plastic

**Application:**

Optimal safety and protection, suitable for almost all brands of shelf racks.

**Execution:**

- Virtually indestructible ballistic plastic body armour
- Highly flexible inner foam for optimal force distribution
- Excellent visibility
- Suitable for cold storage - withstands extreme temperatures down to -40 °C

**Advantage:**

- Prevents accidents and minimises repair work and costs
- Ideal slim design – no loss of shelf space
- Elastic, spring-back, dimensionally stable - returns to its original shape
- Non-toxic and fully recyclable
- Quick, easy installation, does not need to be fixed to the floor
