

Collision protection for rack supports

plastic

Application:

To protect rack supports in event of being driven into/impacts.

Execution:

- Indestructible ballistic plastic outer shell with a wall thickness of more than 7 mm
- Highly flexible inner foam for optimum force distribution
- Easy to install, ref. no. 501 and 503: no tools required

Advantage:

- Prevents accidents and minimises repair time and costs
- Ideal slim design – no loss of shelf space
- Elastic, recoiling, shape-retaining – returns to its original form
- Very high shock absorption for frontal impact force of up to 2.4 t
- Swift, easy mounting, no fixing to the floor required

Art. no.	50172 501
Size	S
Height	600 mm
Material	HDPE - High density polyethylene
Type	Rack Armour®
Suitable for max. shelving stand width	87 mm
Suitable for min. shelving stand width	70 mm
Product Group	504
