

ALLNET Brick'R'knowledge "Advanced Set" (English/Englisch)

>>> Zum Shop-Artikel

EAN CODE

Our Advanced Set contains 111 components, which enable building more complicated and complex solutions. Brick'R'knowledge teaches electronic engineering with its components, units, and operations in an innovative and playful way. Thanks to the educational system, knowledge can be gathered, so that not only you but also our next generation can profit from it. The different bricks can be built to individual circuits by clicking them together. Simple as well as complex electrical and technological topics can be experienced in a totally new way. Due to the open-source factor, bricks can be added and own solutions developed. Brick'R'knowledge isn't all about basic electrical engineering, also RF experiments can be realized, which make the system worldwide unique. Oscilloscopes and signal generators are soon-to-be integrable components in the Brick-system, that will fulfill industrial requirements as well.
