

## Zero setter

Mechanical; with dial gauge

### Application:

For accurately determining the position of workpiece surfaces or workpiece lengths in the Z direction on lathes or milling machines. The device is placed on the workpiece. It is then moved carefully towards the device with the spindle stationary until the dial gauge shows ,0'. The reference dimension of 50 mm is now reached. Allowance has been made for a safety spring travel of approx. 0.5 mm for going beyond the 50 mm.

### Execution:

- Zero point probe for improved guidance, for even more precise determination of the position of the workpiece surface in the Z direction on milling machines and lathes.
- Steel.
- With dial gauge.

### Delivery:

1x zero setter in a wooden case with serial number and test certificate.
