

Transport wheel set

Carrying capacity 3-12 t

Application:

For transporting machines and other heavy loads. All adjustable and steerable wheel sets of the same height that can be combined and are suitable for safe transport of loads of up to 200 tons.

Version:

- Very sturdy, torsion-free steel welded construction
- GKS-alperfekt® roller, slightly steerable, low rolling resistance
- High stability through closed cassettes
- Support surfaces with non-slip waffle rubber
- 5-year warranty

Advantage:

- High comfort during handling
- Material guarantees highest possible fail-safety and remains in shape, no distortion, even after years of use

Art. no.	50261 505
Load-carrying capacity	12 t
Design	Adjustable
