

ATMIS 3D FLEX-LITE CAMOUFLAGE SYSTEM

The ATMIS 3D Flex-Lite Multi Spectral Camouflage Systems are ultra-lightweight and easy to use signature management solutions, designed to conceal and suppress the detection of operatives and or assets in the ultra-violet, visual, near short wave, infra red, thermal and radar spectrums. Works in all conditions, wet or dry, increasing survivability and mission success.

3D illustration

The materials used do not just suppress the signatures of the operatives and asset behind, but are snag free, quick to deploy and dismantle and robust, so maintenance is low.

Compared to Mk7 nets, the ATMIS Multi Spectral Camouflage Systems provide greater protection, security, survivability and mission success.

As standard a single system consists of;

- 1x 3D Incised IRR, Thermal and Radar Woodland Concealment Net 18.9m x 15.3m Stitched not tied
- 12x Support Poles
- 40x Ground Stakes/Pegs
- 2x Bags (Net & Ancillaries)
- 1x Hammer
- 1x Repair Kit
- 1x Manual

Spares and accessories available upon request.
