

ALLNET 4duino Sensor Puls-u. Herzfrequenz

>>> [Zum Shop-Artikel](#)

EAN CODE

Sensor Modul zum erfassen der Herzfrequenz.
Sensor /Fingerclip nicht im Lieferumfang.

1. Instruction This module is mainly to measure heart rate. In order to complete this function, just connect easily to a microcontroller and compile corresponding program.
2. Parameters Working voltage: 3.3---5V
Working current: 800uA Range of working temperature: 0--60
3. Features With DC-DC isolated power, safe low voltage Precise testing data"
