ALLNET 4duino Vibrations Sensor Analog/Digital 801S Mini Vibration Sensor Price
Product Description

- 1.Size: 41 * 15 * 12.5mm.
- 2.The main chip: LM393, vibrating probe.
- 3.Operating voltage: DC 3-5V.
- 4.Has a signal output instructions.
- 5.With analog and TTL-level signal output signal.
- 6.Output valid signal is high, the light goes out.
- 7.Adjustable sensitivity (fine-tuning).
- 8.Vibration detection range, non-directional.
- 9.With mounting holes, firmware installation flexible and convenient.
- 10.Applications:can be used in anti-theft devices, electronic locks, mechanical equipment vibration detection, counting shooting range bull's-eye detection of vibration testing.
