

GK991

Care Instructions:-

1. Always ensure that the furniture is placed on a firm level surface.
2. The wooden parts should be cleaned with a soft cloth
3. We recommend periodical checks to ensure that there has been no damage caused to the chair.
4. To prolong the life of your furniture, please prevent:
 - the furniture from being dropped
 - objects hitting the furniture
 - objects falling onto the furniture
 - the furniture from being dragged across the floor
 - the metal surface being scratched
5. When stacking chairs please handle carefully to prevent risk of damage or scratches.
6. Store the furniture in a dry ventilated room and protect from severe weather
7. Wood is a natural material whose appearance will deteriorate when left outside. A surface coating is vital in protecting it from premature darkening or splitting, when exposed to the weather. The finish should be regularly maintained to ensure that the wood is protected from moisture and the furniture continues to look its best.
 - In order to maintain the appearance of the wood, regular coatings of teak oil should be applied in accordance with the instructions supplied with the oil. The frequency will depend on the weather conditions experienced.
 - If positioned in an exposed position, we recommend the use of a parasol to prevent oils from drying out and flaking. This will help maintain the appearance of the table surface.
 - In order to maintain its appearance, this wooden furniture should be protected from severe weather and stored under cover during winter. A liberal coating of Oil should be given to the furniture before it is laid up and again when it is removed from storage.
 - Should you choose not to treat your furniture then it will turn a greyish colour and develop cracks. Light sanding can restore the original colour after which teak Oil can be regularly applied in accordance with the instructions above.
