RS Stock No: 250-8777, 250-8778, 250-8779

RS PRO Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Contactor Accessories

Product Description

Wiring kits for RS PRO contactors are pre-assembled sets of electrical components used for facilitating the connection between contactors and their associated control systems. Contactors themselves are electrical relays used to switch an electrical power circuit, typically used in applications where the control of electric motors, heating elements, or lighting systems is required.
