

IMPACTO® KNEE PROTECTION

Heavy Duty Knee Pads

- Co-Polymer toxin-free foam padding provides excellent knee protection
- Kneepad bends with the knee for comfort and flexibility
- Molded design cups the knee cap
- Ribbed surface helps prevent slipping
- Helps prevent abrasion and knee stress
- CoolMax® lining wicks away moisture
- Lightweight feel for comfortable all day protection
- Single elastic strap is weaved through the kneepad for easy replacement

ABOUT KNEE PROTECTION Continuous pressure on the knee due to working in a kneeling position may lead to chronic conditions, such as bursitis over the knee cap or injury to the cartilage. Excessive pressure can cause problems such as knee burn pain, fluid build up, tissue swelling, loose joints and associated arthritic conditions. Major knee damage will occur when combining existing trauma with prolonged pressure and irritation along with turning and twisting motions. The use of knee pads is an effective way to reduce the occurrence of knee injuries. Knee pads protect against injuries and inflammation caused by hard surfaces, pieces of gravel and similar objects on ground.

One Size
Sold per pair
40 pairs per case

845-00
extended wing style
design and double
elastic straps
