

## Features

- AC varistor suppressors
- Protect electrical and electronic devices from transient overvoltage conditions in alternating current (AC) circuits
- Variable resistance that changes in response to fluctuations in voltage
- Smooth operation
- Peace of mind.

## RS PRO Varistor Suppressors – 24V ac to 400V ac

RS Stock No: 250-8769, 250-8771, 250-8772, 250-8773

RS PRO Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

# Contactor Accessories

## Product Description

AC varistor suppressors from RS PRO are electronic components utilised to protect electrical and electronic devices from transient overvoltage conditions in alternating current (AC) circuits. These devices are designed to have a variable resistance that changes in response to fluctuations in voltage, thus providing an effective means of voltage regulation and protection.
