Chameleon Mini USB Lamp N4230 and N4231 Gallery

Chameleon Mini USB Lamp N4230 and N4231

The Chameleon Mini USB Magnifier is available in black and white. This lamp is used by people that like to sew, read, craft, work in electronics and the beauty industry. Its modern sleek design means it doesn't take up too much of a foothold on your desk and can be folded down neatly when it is not being used.

The magnification is 1.75X 3D if you work with intricate details using the magnifier and the Daylight setting this is invaluable as it will help you see much more clearly, the Daylight setting is very helpful with colour

This is invaluable as it will help you see much more clearly, the Daylight setting is very helpful with colour matching

If you need that extra help when you are using a sewing machine this light fits perfectly with a sewing machine and gives you that extra help with the magnifier.

Nail artists find it really helps when they are doing intricate nail art

The controls are on the cable of the lamp and this is where you select the colour temperature from warm, cool or Daylight

The controls on the cable feature three buttons which control the power, colour temperature of the lamp (2800K, 4000K and 6500K), as well as adjusting the brightness of light. It is powered by USB so can be directly plugged into a sewing machine USB, battery pack or the mains with the plug that is supplied.

The bright LEDs clearly light up the area around the glass magnifier and last up to 40,000 hours. Led's never need replacing and generate very little heat and are very cost effective due to the low amount of energy that they use.

Ideal for use in Chiropody and Podiatry, Beauty treatment rooms, Nail salons, Electronic inspection, Sewing rooms and Craft rooms.

The clamp will fit on any flat surface and has cushion pads so the clamp wont damage any furniture.

The opening of the clamp is from 1cm-7cm the stem of the lamp fits into the clamp then you tighten the screw to secure it.
